Summary

I am fond of data and love using it at work and outside of work to solve problems, make decisions, improve lives or just for fun. I hate redundancy and bad processes, love streamlining and automating all these manual things we humans shouldn't be doing. What I bring to the team is a fresh point of view, a desire to learn fast and to pass it on, an ability to communicate things well, a steady flow of asking "Why?", a diverse background, a funny accent, and some positive mental attitude to match.

Objectives

- Looking for a company with a high degree of trust in its employees
- Will consider relocating
- Regardless of location, looking for a company where processes, policies and workflows support remote and flexible work.
- Well positioned and equally interested to be a senior IC, a team lead or a manager of a small team.

Tools

- **SQL**: 6 years
- **R**: 4 years
- **Power BI**: 4 years
- **Tableau**: 1 year

Areas of expertise:

- Web analytics & digital analytics
